

| <b>Solutions</b>                                                                                                                                                                                                     | <b>Federal</b> | <b>State/<br/>Local</b> | <b>Private<br/>Sector</b> |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------|-------------------------|---------------------------|
| Make changes to the PPP, by targeting small and micro businesses in underserved areas, ensuring set asides for CDFIs, which BIPOC-owned businesses utilize more than traditional banks.                              | X              |                         |                           |
| Continue to prioritize state-level business investments (e.g., Michigan Economic Development Corporation funding) for grants and loans for small and micro businesses in underserved areas impacted by the pandemic. |                | X                       | X                         |
| Expand efforts to support small and micro businesses to prepare for future disruptive events (e.g., through targeted trainings and additional funding).                                                              |                | X                       | X                         |
| Continue to work with trade organizations to develop reopening guidelines that take into consideration the unique needs of small and micro businesses in underserved areas.                                          |                | X                       | X                         |
| Build and strengthen the financial acumen of small and micro business owners through improved bookkeeping and record keeping.                                                                                        |                | X                       | X                         |
| Collect and disseminate disaggregated data on where pandemic-related aid has gone to small and micro businesses in underserved areas to identify gaps.                                                               |                |                         | X                         |
| Research how other cities have supported small and micro businesses in underserved areas during the pandemic and share best practices.                                                                               |                |                         | X                         |
| Provide practical technical assistance for reopening, stabilizing, and sustaining small and micro businesses.                                                                                                        |                |                         | X                         |
